XeC Announces One-Day Crash Course on the Leasing Industry

(Irwin, PA) XeC announces a new One-Day Crash Course on the U.S. Leasing Industry for professionals with at least 5 years of work experience. The content is distilled from XeC's 3-Day Overview and the 6-Day Full Curriculum.

"The market has clearly asked for this. Many companies cannot afford 3 days of downtime, but they want a rapid overview of key issues," stated John Voytko, President of XeC, "Especially consultants and accounting firms. 'Just cover everything in a day' is the request. To build additional value and really get at the critical issues, our people need to be able to talk leasing to our leasing clients."

Michael Pochan, CEO of XeC and an Adjunct Professor at Carnegie Mellon's Graduate Business School, added, "This is not unusual in a business environment where time is so precious. Many people realize they can get further knowledge on the topic by reading it on the Internet or by subscribing to XeC's on-line follow up presentations. It is that first day of familiarization that is critical."

The One-Day program content was developed by XeC's senior experts who have implemented over 451 lease and asset finance systems over the past 21 years. They have trained hundreds of lessors, internal development staff, consultants, as well as dozens of their own employees who supported lease administration and accounting software.

Companies interested in learning more about the service can contact John Voytko at 724-861-9953 or info@xec1.com. URL: <http://www.xec1.com>

XeC is a software consulting group specializing in lease and asset finance system implementations and IT education.
